

## Documentation: Setup instructions, API key configuration

### Setup

1. **Download / Clone** from the repo, download /extensions file.
2. **Load into Chrome:**
  - Open chrome://extensions/
  - Enable **Developer mode** (top-right toggle)
  - Click **Load unpacked** and select the dist/ directory (or project root if from source).
3. **Open Sidepanel:** Pin the extension icon → click it to launch the transcription sidepanel.

### API Key Configuration

- Get a **Google Gemini API Key** at Google AI Studio.
- In the sidepanel, paste your API key into the **API Key field** and click **Save Key**.
- The key is stored **locally in chrome.storage.local** only.
- You can update or clear it at any time from the sidepanel.
